

WOMBAROO CAT MILK REPLACER

A nutritionally balanced milk substitute for kittens of all breeds. Use for orphaned kittens or when the mother's milk is limited.

About Cat's Milk

Different species of mammals produce milks of different composition in order to nourish their young. The table below outlines the differences between normal cow's milk and cats' milk.

	Cow	Cat
Solids (g/litre)	127	195
Protein %	26	42
Fat %	30	25
Carbohydrate %	38	26
Energy (MJ/litre)	2.8	4.1
Taurine (mg/litre)	10	359

Cat's milk is characterised by having relatively high protein levels with only moderate amounts of fat and carbohydrate (lactose). The protein in cat's milk is high in readily digestible whey proteins, compared to cow's milk which is predominantly caseins. Cat's milk also contains high levels of the sulphonic acid taurine which is an essential nutrient for kittens. In cats a dietary deficiency of taurine can lead to blindness, hair loss, tooth decay and heart failure.

Benefits of Wombaroo Cat Milk Replacer

- **Closely resembles Cat Milk** - formulated to match the composition of the mother's milk, with added vitamins, minerals and essential fatty acids (omega 3 & 6).
- **High in Whey Proteins** - for improved digestibility and growth rate of kittens
- **Elevated Taurine Content** - essential for development of healthy kittens.

Using Cat Milk Replacer

- Success in rearing kittens greatly improves if they receive colostrum at birth. Kittens that don't get colostrum from the mother can be fed **Impact Colostrum Supplement**.
- Commence feeding milk formula after the initial feeds of colostrum. Make up Wombaroo at a concentration of 215g per litre, in accordance with the directions on the pack.
- Milk can be stored in the fridge for a day or frozen for up to 2 weeks. Small quantities can be frozen in ice-cube trays, so that the required daily feed volumes can be easily thawed out.
- When feeding, warm milk to about 35°C and feed from a bottle and teat (A Wombaroo "C" type teat is recommended).
- Refer to the guidelines on the pack for feed rates. Do not overfeed as this can lead to diarrhoea.
- Weigh kittens regularly to verify consistent weight gains. Body weight should increase by about 10-15 g per day.

Ingredients:

Whole milk solids, whey protein, casein, vegetable oils, omega-3 & omega-6 fatty acids, taurine, vitamins A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, E, K, biotin, choline, inositol, calcium, phosphorus, potassium, sodium, magnesium, zinc, iron, manganese, copper, iodine, selenium.

Analysis:	Protein	43%
	Fat	27%
	Ash	5%
	Moisture	4%
	Energy	21 MJ/kg

Available in 215g, 1kg, 5kg, 10kg & 20kg packs.
