

The Good Oil

Omega 3 & 6 Blend for Animals

A supplement for animals deficient in essential fatty acids to help maintain a healthy skin and coat.

What are essential fatty acids (EFAs)?

EFAs are the polyunsaturated omega 3 & 6 components of fat that are essential to normal biological function. They cannot be synthesised by the body and must therefore be supplied in the diet. EFA deficiency in animals is often characterised by poor skin condition and a dull, coarse or uneven coat.

The Good Oil contains the following EFAs and fat-soluble vitamins:

Omega 3 & 6 fatty acids to help maintain a healthy skin and coat condition.

Vitamin A for vision and maintenance of skin tissue.

Vitamin D₃ for bone growth and absorption of calcium.

Vitamin E which is an antioxidant and helps maintain cell membranes.

Dose: 0.5mL per kg of body weight applied daily to food for 2 weeks, thereafter every second day. The highly palatable oil is readily accepted by most animals.

Each mL contains

- 410mg Oleic Acid (omega 9)
- 290mg Linoleic Acid (omega 6)
- 110mg α -linolenic Acid (omega 3)
- 25mg Eicosapentaenoic Acid (omega 3)
- 12mg Docosahexaenoic Acid (omega 3)
- 30 μ g Vitamin A
- 2 μ g Vitamin D₃
- 3mg Vitamin E

Available in 250mL, 500mL, 1L and 5L
