

Reptile Supplement

	Reptile Supplement	Analysis	
	Balanced diet for captive reptiles including bearded dragons, blue-tongued lizards, turtles and snakes.	Protein	55%
	Use to boost dietary protein, vitamin, calcium and mineral intake.	Fat	14%
	Pack size: 250g, 1kg, 5kg.	Carbohydrate	11%
		Energy	17 MJ/kg

Directions for Use

Meat-mix: Mix 10g (1 level scoop) of powder with 20g minced meat, fish or hard-boiled egg.

Add extra water to moisten if necessary. Mix in live insects to encourage intake.

Veg-mix: Mix 10g (1 level scoop) of powder with 40g finely diced fruit or vegetables.

Soft Pellets: Mix 20g (2 level scoops) of powder to 12mL of warm water.

Slowly add the water and mix into a putty-like consistency. Break-off small pieces and roll into soft pellets for feeding. Drinking water should always be available.

Liquid Slurry: Add 10g (1 level scoop) of powder with 15mL of warm water.

Slowly add water and mix to make a slurry of the required consistency. Let the mix stand for 2 minutes to absorb all the water. If too thick, add a little more water and continue mixing. Feed at about 30°C using a syringe with large bore. Use as a force-feeding formula for sick or injured reptiles.

Feed Recommendations

Turtles: Feed a variety of live food supplemented with Meat-mix or Soft Pellets. Avoid contaminating the tank by removing any uneaten food. Do not overfeed.

Bearded Dragons, Blue-tongued Lizards & Larger Skinks: Feed a variety of live food and plant material supplemented with Veg-mix, Meat-mix or Soft Pellets.

Goannas & Snakes: Feed whole-body prey items stuffed with supplement at the rate of 5g per 50g carcass weight. Cavities in prey may be stuffed by preparing as a slurry and using a syringe.
