

✓ Complete balanced diet

✓ Easily digested

✓ Feed wet or dry

Complete Lorikeet is a nutritionally balanced diet for lorikeets and lories.

About Lorikeet Diets

In the wild, lorikeets feed mainly on flowering native plants. They obtain energy from the simple sugars in nectar (e.g. sucrose, glucose), while pollen supplies protein and other essential nutrients. Lorikeets have a simple digestive tract and consume easily digested food, resulting in their naturally "squirty" droppings.

Unfortunately, poorly-formulated commercial diets or home-made recipes are a common source of disease and mortality in captive lorikeets.

Benefits of Complete Lorikeet

- **Excellent Nutrition** – Enriched with essential amino acids (lysine, methionine), omega-3 & 6, vitamins & minerals.
- **Improved Health** – High-quality protein for good feather and body condition. Moderate iron & vitamin A levels reduce the risk of dietary overload.
- **Calculated Feed Guidelines** – To minimise waste and prevent over-feeding.

Directions

Feed dry, or mix with warm water to a desired consistency. Always ensure that fresh drinking water is available. Remove soiled or uneaten food daily. Captive birds are prone to over-eating, so feed according to the guidelines on the pack.

Offer a variety of fruit, vegetables and as much native blossom as possible.

Wild Lorikeets: Limit feed quantity and frequency to reduce dependence on the food. Thoroughly clean feed containers between feeds.

Ingredients

Sucrose, glucose, processed cereals, soy & whey protein isolates, vegetable oils, omega-3 & omega-6 fatty acids, lysine, methionine, carotenoids, vitamins A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, K, biotin, choline, calcium, phosphorus, potassium, sodium, magnesium, zinc, iron, manganese, copper, iodine, selenium, 1g/kg Actigen® dried yeast prebiotic.

Analysis

Protein	13%
Fat	6%
Ash	3%
Moisture	4%
Energy	16 MJ/kg

Available in 500g, 1kg, 5kg, 10kg & 20kg packs
