

-  **Nutritionally balanced**
-  **High quality protein**
-  **Improves seed diets**

**Egg & Biscuit** is a nutritional supplement for cage & aviary birds including canaries, finches, parrots & pigeons. Feed to breeding adults, weaning chicks or birds on a seed-based diet.

### About “Egg & Biscuit” Diets

“Egg & Biscuit” is traditionally used to provide a nutritional boost for captive birds. Home-made mixes typically contain hard-boiled egg, crushed biscuit crumbs, with added vitamin & mineral supplements. However, these are often unbalanced, and do not necessarily meet bird’s specific nutritional requirements. Similarly, many commercial egg & biscuit products are poorly formulated, using cheap ingredients of low nutritional value.

### Benefits of Passwell Egg & Biscuit

- **Nutritionally Balanced** – Formulated to meet the specific nutritional requirements of cage & aviary birds.
- **Quality Protein** – Whole egg, soy & whey proteins to achieve a balanced amino acid profile.
- **Improved Breeding Condition** – Vitamins, minerals and omega-3 & 6 to enhance egg production and chick health.

### Directions

Add water to make a moist crumble, or mix with diced vegetables, chopped greens, mashed hard-boiled egg or soaked seed. Can also be fed dry. Refer to feeding guide on pack.

**Weaning Young:** Egg & Biscuit is ideal for weaning young on to a solid diet. Offer once young are fully-feathered and starting to self-feed.

**Conversion to Crumbles/Pellets:** Birds will readily convert from Egg & Biscuit to **Passwell Crumbles/Parrot Pellets** by mixing the products together, then gradually increasing the proportion of crumbles/pellets.

### Ingredients
