

WOMBAROO GRANIVORE REARING MIX

Balanced diet for rearing or supplementing grain-eating (granivorous) birds including parrots, cockatoos, finches, doves, pigeons and quail.

About Granivore Diets

Granivorous birds obtain most of their energy from the complex carbohydrates in seeds and grain. In particular, they have high levels of digestive enzymes required for processing the starch in their diet. In the wild, granivores eat a variety of fresh green seed, fruits, other plant material and some insects. In captivity however, these birds are often maintained on dry seed diets, which are deficient in many nutrients.

In the breeding season, granivorous birds have an elevated requirement for protein, fat and other nutrients. This is required for proper development of eggs and to cater for the needs of their fast-growing chicks.

In order to provide optimum health in captivity, their diet needs to be fortified with essential amino acids, fatty acids, calcium, minerals and vitamins.

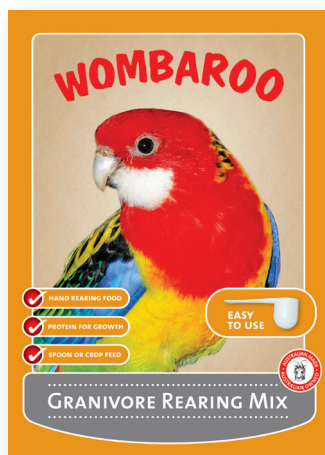

Benefits of Granivore Rearing Mix

- ✓ **Ideal for Hand-Rearing** – elevated levels of protein, omega-3 & 6, vitamins and minerals for improved chick health.
- ✓ **Supplement for Breeding Birds** – provides for the increased nutritional requirements of breeding birds.
- ✓ **Nutritional Support** – assist-feeding formula for young, sick or malnourished birds.

Using Granivore Rearing Mix

Feed as a complete diet for hand rearing chicks or as a supplement for adult birds:

- **Hand Rearing:** prepare by mixing powder with warm water to make a slurry for spoon or crop feeding. Feed according to directions on pack.
- **Fruit & Veg:** Mix 1 scoop of powder (7.5g) with 20g diced fruit or vegetables. Feed to parrots, pigeons and frugivores.
- **Egg Food:** Mix 2 scoops of powder (15g) with 1 mashed hard-boiled egg. Feed to canaries, finches and breeding birds.

Ingredients:

Processed cereals & vegetables, soy protein, whey protein, maltodextrin, glucose, lysine, methionine, mannan oligosaccharides, β -glucans, vegetable oils, omega-3 and omega-6 fatty acids, taurine, carotenoids, vitamins & minerals.

Analysis:	Protein	22%
	Fat	8%
	Calcium	1.1%
	Vitamin D ₃	1200 IU/kg

Available in 250g, 1kg & 5kg packs.
