

- ✓ **Breeding supplement**
- ✓ **Chick weaning food**
- ✓ **Balances fruit & veg diets**

Parrot Soft Food is a high-protein supplement for parrots and cockatoos. Feed to breeding adults, weaning chicks or birds on a seed or fruit-based diet.

About Parrot Diets

In the wild, parrots consume a wide variety of seeds, nuts, insects and larvae. Generally, these foods provide a superior protein and nutrient value compared to commercially-grown fruit & veg or dry seed mixes fed in captivity. Captive diets are often unbalanced and may lack a range of essential nutrients, such as amino acids vitamins & minerals which are particularly required for breeding or growing birds.

Benefits of Parrot Soft Food

- **Excellent Nutrition** – Enriched with omega-3 & 6, vitamins & minerals to enhance breeding condition.
- **High in Protein** – Fortified with essential amino acids (lysine, methionine) for good muscle and feather condition.
- **Highly Palatable** – Readily accepted by most parrots, making it easy to provide a nutritious, balanced diet.

Directions

Add water to make a moist crumble, or mix with diced vegetables, chopped fruit or soaked seed. Refer to feeding guide on pack.

Weaning Young: Parrot Soft Food is ideal for weaning young on to a solid diet.

Offer once chicks are fully-feathered and starting to self-feed.

Conversion to Pellets: Birds will readily convert from Parrot Soft Food to **Passwell Parrot Pellets** by mixing the products together, then gradually increasing the proportion of pellets.
