

WOMBAROO REPTILE SUPPLEMENT

Boosts nutritional quality of captive diets for reptiles including bearded dragons, blue-tongued lizards, turtles and snakes.

About Reptile Diets

Reptiles consist of a variety of species which consume a diverse range of foods to satisfy their nutritional requirements. This includes insectivores (small skinks and geckos), omnivores (blue-tongues, bearded dragons & short-necked turtles) and carnivores (long-necked turtles, goannas and snakes).

However, in captivity, a lack of dietary variety can lead to nutritional disorders such as Metabolic Bone Disease (caused by a deficiency of calcium or vitamin D₃).

Captive diets should therefore be supplemented with a full range of nutrients including protein and fat for growth as well as essential vitamins & minerals. Whilst calcium supplementation is important, this needs to be balanced to avoid deficiencies in other minerals such as zinc and copper.

Serving Suggestion

Benefits of Reptile Supplement

- ✓ **Palatable & Easy to Use** – mix with meat, insects, fruit or veg to provide a balanced diet.
- ✓ **High in Protein** – plus essential fatty acids, vitamins & minerals for skin and muscle growth.
- ✓ **Added Calcium & Vitamin D₃** – for healthy bone growth.

Using Reptile Supplement

Feed according to the dietary preference of the reptile species. Mix in with live insects or whole food to encourage feeding:

- **Meat Mix:** Mix 10g (1 scoop) of powder with 20g of minced meat, fish or hard-boiled egg.
- **Veg Mix:** Mix 10g (1 scoop) of powder with 50g finely diced fruit or vegetables (see serving suggestion).
- **Soft Pellets:** Mix 20g (2 scoops) of powder with 12mL of warm water. Make into a putty-like consistency and roll small pieces into pellets for feeding.
- **Liquid Slurry:** Mix 10g (1 scoop) of powder with 25mL of warm water. Feed using a spoon or syringe and tube as force-feeding formula for sick or injured reptiles.
- **Whole Prey:** Stuff with supplement at the rate of 5g per 50g carcass weight.

Ingredients:

Meat meal, fish meal, blood meal, whey protein, soy protein, lysine, methionine, mannan oligosaccharides, β -glucans, lysine, vegetable oils, omega-3 and omega-6 fatty acids, taurine, carotenoids, vitamins & minerals.

Analysis:	Protein	55%
	Fat	14%
	Calcium	2.2%
	Vitamin D ₃	1000 IU/kg

Available in 250g, 1kg & 5kg packs.
