

Formula One Low Lactose Milk

 <p>Formula One low lactose milk</p>	Formula One	
	<p>Low-lactose milk formula that can be used for a range of different species including puppies, kittens, lambs, piglets, calves, foals, cria & marsupials. Use as an emergency milk replacer.</p> <p>Pack size: 500g, 1kg, 5kg, 20kg.</p>	
	Analysis	
	Solids	125g/litre
	Protein	24%
	Fat	30%
Carbohydrate	36%	
Energy	2.8MJ/litre	

About Low Lactose Milks

Lactose is a disaccharide or “double sugar”, made from the simple sugars galactose and glucose. It is the main carbohydrate present in the milk of cows, goats, horses and humans. However, many species have low levels of lactose in their milk, and do not digest it readily due to reduced activity of the enzyme lactase. The use of a low-lactose milk formula is therefore preferable to using cow’s milk formulas, especially for those animals that suffer from lactose-induced diarrhoea.

Low-lactose milk products are normally prepared from cow’s milk, but with the lactose broken down into its component sugars. This process does not alter the nature or composition of protein or fat in the milk, which can be quite inappropriate for other mammal species. For example, cow’s milk contains deficient levels of whey protein, taurine, unsaturated fat & essential fatty acids compared to the milk of many other species.

Formula One is a superior low-lactose milk product because it is made from fortified ingredients to produce a milk that is low in lactose, but with an improved nutritional profile compared to cow’s milk products.

We recommend to use Formula One as an emergency milk replacer for any species of animal until the correct species-specific Wombaroo milk can be administered.
